

Digital Photography One & Two

PHOTOSHOP BASICS ASSIGNMENT – 50 Pts: Done in class - Due Friday. 6/25

1. Open any photo in Photoshop & go to Image (top menu bar) - & Duplicate, then close out the original, but save the original to include for grading.
2. Go to Crop tool (tools menu on left) click & drag it to crop it, & hit return.
3. Go to Image in top menu bar & change image size to fit **within** 8.5x11 inch. This does not have to match exactly, only fit within it. (be sure the width & height are linked together) & put 300 in Resolution box,
4. Use clone stamp (tools menu on left) adjust the brush size (using the Bracket Keys to the right of Letter P) & option/click on a spot to copy over to another area.
5. Go to the top menu, click on Layers, then New Adjustment Layer & click on Hue/Saturation & change the overall image with the sliders dramatically.
6. Repeat step 5 above but choose any other adjustment in the menu Ex. Bright/Contrast.
7. Select an area of the photo using any of the selection tools 2nd , 3rd or 4th down in tools menu on left
8. With an area now selected Go to the top menu, click on Layers, then New Adjustment Layer & click on Hue/Saturation & change the selected portion of the image with the sliders dramatically.
9. Go to File – Save As – (Format- Photoshop) PSD, Save in: your folder on your desktop! Then save again the same way but this time as a JPEG (.JPG).
