

Digital and Film Photography

Mr. Stiles

FALL 2020

WHATS IN YOUR HEAD?

Take two portraits of one or two people from the mid chest up (or closer). The portraits should be photos you took. Then using Photoshop open their head to reveal what they are thinking about. Turn in 2 of these as PSD's Photoshop documents with all layers showing. Try to create images similar to those shown below on the 2nd page.

Explore the links below for tutorials relating to this technique:
