How to take a screenshot on a Windows PC:

The simplest way to **take a screenshot** in Windows is to use the **Print Screen** button. You'll find it on the upper-right side of most keyboards. Tap it once and it will seem like nothing happened, but Windows just copied an image of your entire screen to the clipboard.

Take a screenshot on your Mac

1. To **take a screenshot**, press and hold these three keys together: Shift, Command, and 3.
2. If you see a thumbnail in the corner of your screen, click it to edit the **screenshot**. Or wait for the **screenshot** to save to your desktop.
